Alex

Do we want to share with the states to verify the accuracy and completeness?

Doug

Here is a list of potential PFAS sites in Region 1 provided to Alex by one of the community activists from Westfield, MA (non NPL). I cannot vouch for its completeness or accuracy.

Thanks Kelsey,

Do you or Jim know if there's a list of R1 SF sites where PFAS/PFOS is an potential issue? Does Bryan/OSRR have a list? Not sure which of mine have this issue. I can think of two possible sites.

Sarah

Hi everyone,

In talking with Jim and Doug this morning, we want to share the press release and information on the Regional PFAS summit with communities impacted by PFAS, including at superfund sites. If

you have any sites impacted by PFAS, please share the press release below with your contacts on the sites.

Thanks,
Kelsey

EPA to Hold New England Community Engagement on PFAS

WASHINGTON (June 11, 2018) – On Monday, June 25, 2018, the U.S. Environmental Protection Agency will host a public event off the per- and polyfluoroalkyl substances (PFAS) community engagements in Exeter, New Hampshire. This event allows EPA to hear directly from New England communities, state, local, and tribal leaders about their experiences with PFAS and the challenges they face. EPA will take action on PFAS.

“Following the historic PFAS National Leadership Summit, it’s critical that EPA visit communities to hear from those impacted by PFAS,” said EPA Administrator Scott Pruitt. **“This is the next step in our commitment to address challenges with PFAS, and these visits will provide valuable insight for EPA’s efforts moving forward.”**

<image005.png>

Both days will be open to the public and the press.

The New England Community Engagement event will consist of two sessions – a public listening session and a working session – to hear from the public; provide tools to assist states, tribes, and local communities in addressing challenges with PFAS in the environment; and understand ways EPA can best support the work that’s being done at the state, local, and tribal level.

The public is invited to speak during the June 25th listening session. Those interested in speaking can sign up for a 5-minute speaking slot at this link: <https://www.epa.gov/pfas/forms/pfas-community-engagement-exeter-nh>

The full agenda will be made available in the upcoming days. Please check back at the [PFAS Community Engagement website](#) for further information leading up to the event. Citizens are also encouraged to submit written statements to the public docket at <https://www.regulations.gov/> enter docket number: [OW-2018-0270](#).

New Hampshire marks the first community engagement. Throughout the summer, EPA will visit and similar events in additional communities across the country. Information on these upcoming sessions will also be available on the [website](#).

At the PFAS National Leadership Summit in Washington, D.C. on May 22-23, Administrator Pruitt announced the actions EPA will take:

1. EPA will initiate steps to evaluate the need for a maximum contaminant level (MCL) for PFOA and PFOS and will convene our federal partners and examine everything we know about PFOA and PFOS in drinking water.
2. EPA is beginning the necessary steps to propose designating PFOA and PFOS as “hazardous substances” through one of the available statutory mechanisms, including potentially CERCLA Section 102.
3. EPA is currently developing groundwater cleanup recommendations for PFOA and PFOS at contaminated sites and will complete this task by fall of this year.
4. EPA is taking action in close collaboration with our federal and state partners to develop toxicity values for PFOA and PFBS by this summer.

The public’s input is incredibly valuable and meaningful to EPA. Using information from the National Leadership Summit, public docket, and community engagements, EPA plans to develop a PFAS Management Plan for release later this year. In addition, a summary of the New England community engagement event will be made available on the [Community Engagement website](#) following the event.
